CSE 1112 Structured Programming Language Laboratory
Section C
Summer 2021
Lab 8(Home)

1. Declare a structure date with year, month and day (all integer) as its attributes. Take five dates as input.
 - Print the stored data as output.
 - Print the oldest date.
 - Print the dates that fall on a leap year.
 - Take a month as input. Print the dates that fall on that month.
2. Declare a structure distance with feet and inch as its attribute. Take two distances in feet inch as input. Calculate their sum and print as output.
