CSE 1112 Structured Programming Language Laboratory
Section B
Summer 2021
Lab Assessment 3

Write a program to take a $n \times n$ array of numbers as input ($n \leq 10$) and find the minimum number of the entire array. Then replace the maximum number of each column by that value.

Sample Input:

n: 5

Enter numbers:

```
5 9 3 1 4
1 2 6 7 9
8 -1 4 2 2
7 7 3 5 5
4 6 8 9 3
```

Sample output:

Minimum is: -1

```
5 -1 3 1 4
1 2 6 7 -1
-1 0 4 2 2
7 7 3 5 5
4 6 -1 -1 3
```
